Stacking System

Performance Tested for Harsh Operational Conditions

ECS cases are tested in
accordance with MIL-STD-810G:

High and Low Temperature

Proven performance in temperature extremes
ranging from -65° F to +185° F.

Drop Testing

Able to withstand the rigors of deployment - drop
tested from a height of 24 to 48 inches. Impacts
conducted on all corners, flat surfaces and
edges for a total of 26 drops.

Basic Transportation Vibration

Built to move, ECS cases are exposed to vibration
environments for a duration of 30 minutes per
mutually perpendicular axis.

Loose Cargo Bounce

ECS cases show no damage and/or degradation
when exposed to Loose Cargo Transportation
environments for 30 minutes.

Water Submersion/Wind Blown Rain

ECS cases show no evidence of water intrusion
and/or damage as a result of exposure to 40 mph
wind blown rain conditions.

Wind Blown Sand and Dust

ECS cases are desert ready and show no evidence of
damage and/or sand or dust intrusion.

Fungus Growth

ECS case materials will not support fungus growth.

Low Pressure

ECS cases are not damaged and/or degraded when
exposed to low pressure environments.

LOADMASTER™ DRAWER CASES

Heavy Duty, Lockable Aluminum Drawer Tote

Loadmaster™ Drawer Tote Cases are rotationally molded of linear low density polyethylene and come with heavy duty, lockable aluminum drawers.

Standard features include:

- Edge casters and extendable tote handle allow for easy transport
